

Princess's Resume

Princess is a Dog

Owner's Name: **Mr. and Mrs. Dog**

Phone Number: **555-555-5555**

Email Address: **dog@example.com**

Training

Princess completed Obedience Training at Pet Trainer on November 1, 2007. Princess takes the Pet Training Refresher course every 2 years. Princess is trained to let us know when she needs to go outside. We always carry pickup bags. When we're not home, she is trained to use a pad.

Experience

Princess has lived with me for 6 years in an apartment similar to the one I'd be renting. This apartment is a good fit for Princess because it has plenty of windows, She loves to people watch! Princess is a good tenant because her breed, Maltese, is hypoallergenic. She loves to play with other dogs and she doesn't shed! She's a small dog, which is great for living in the city! A quick walk around the block tires her out. She has great house manners. She is even certified as a Canine Good Citizen by the American Kennel Club. She 's a certified emotional support animal. She took care of my grandfather for 4 years!

About Princess

Princess is 10 years old and she's lived with us her whole life. She weighs 7 pounds. She's a Maltese and we keep her hair at puppy length. She's hypoallergenic, so she never sheds! Princess really likes being indoors. When she has to use the bathroom, she runs outside to go as quickly as possible to get back inside. Princess shakes a lot when she hears loud noises. We hold her close to make her comfortable during storms. Princess loves to lie on top of my legs when I am working or watching TV. I love that Princess took care of my grandfather by running to let us know if he woke up at night or fell.

How I Care for Princess

Princess goes to the bathroom at 8:30 a.m., 6 p.m. and midnight outside every day. She goes for walks at each of these times. She lays in bed with me from midnight to 8 a.m. every day. We have her vaccinations and our contact information on her collar. She has a microchip, in case she gets lost. Princess is spayed. The veterinarian uses a gel on Princesses neck to prevent against fleas and ticks, and she wears a flea collar. Our local vet will be Dr. Canine. We have pet insurance for Princess' health and renter's insurance to protect the apartment. On vacations, we will leave Princess with my mother who lives 2 miles north of this apartment. We will add extra rugs to protect the flooring from unlikely accidents.

Skills

Princess knows how to sit, give us her paw and she responds to her name.
